We Remember: LAND Family Loses Four Members

Since spring the Aggie/LAND family has lost four members. Robert F. White, the founding Department Head for Landscape Architecture, passed away in May. Many former students attended his funeral in Bryan. His wife, Florence, survives him. In June, Robert Rucker, class of 1938, and a former Head of the TAMU Horticulture Department, died. Also, in June, Lane Marshall, Department Head in the 1980s died at his home in Kansas. Dan H. Heyn, class of 1949, died in Richardson in September. Their life and career stories are found later in AggieLAND.

(Continued on page 4)

Thanks to Our Donors

As you may be aware from the news or from your own children’s tuition and fees, state support for TAMU has been decreasing. We work hard to compensate for these losses through research funding and grants. But we would not be able to accomplish our education mission without the generous support that former students and friends of the programs have provided over the years. The names of those who have recently donated are found on page 3.

Special thanks to Gene Schrickel, who established an endowed scholarship, as well as the Development Fund, and to Dennis Jerke, who designed and organized our current fund raising program. We wish to thank all of you for your generosity in continuing to support our development and scholarship funds.

Department News: Interim Department Head Installed

Dr. George Rogers stepped down as the Head of Landscape Architecture and Urban Planning after four years of service, first as Interim Department Head and then as permanent Head. Over the years of his term, George provided guidance and aid to our LAND programs during times of financial cutbacks, our successful BLA program reaccreditation, and several faculty searches. We all thank him for his efforts on behalf of the landscape architecture programs.

Dr. Walter Peacock will serve as Interim Department Head for the 03-04 school year. Dr. Peacock has a Ph.D. from the University of Georgia. Before coming to TAMU in 2002, he served on the faculty of Florida International University in Miami. Dr. Peacock is interested in urban planning, sustainable community development, natural hazards, and hazard mitigation, areas in which he both teaches and conducts research.

Tom Reagan, Dean of the College, has authorized establishment of a Search Committee to identify candidates for the permanent Department Head position. We plan to have the position filled by September 2004. The Search Committee, which makes recommendations to the Dean for his final choice, will include former students, faculty members, and current students. The position announcement can be found at the College website at http://archweb.tamu.edu/college/index_ie.html. Qualified candidates whose major experience in practice are encouraged to apply for this position.

We need your email address — see Page 7.
LAND Faculty

Young Bloods

Since 1999
Assistant Professor
Dr. Byoung-Suk Kweon has degrees in Horticulture from University of Seoul (BS); in Landscape Architecture from The City College of New York (BLSA) and Cornell University (MLA); and in Natural Resources and Environmental Science from University of Illinois at Urbana-Champaign (Ph.D.). Her research interests include the psychological, social, and health benefits of natural and built environments. She also focuses on creating healing and therapeutic environments for the elderly and hospital patients.

Since 2003
Assistant Professor
Dr. Ming-Han Li holds a BS in agricultural engineering from National Taiwan University, an MS in civil engineering from University of Texas at Austin, and an MLA and a Ph.D from TAMU. Dr. Li is also an Assistant Research Engineer at Texas Transportation Institute. His interests include biotechnical engineering, stormwater management, hydraulics, hydrology and landscape construction. Dr. Li holds two professional licenses: one in landscape architecture; the other in civil engineering.

Since 1999
Assistant Lecturer
Taner Ozdil is a Ph.D. candidate at Texas A&M University. Mr. Ozdil holds a BLA from University of Ankara in Turkey and an MLA from University of Colorado. His area of interest include landscape architecture, urban design, environment and behavior, downtown pedestrianization, post-occupancy evaluation (POE), online design education, photography and Texas main street program.

Familiar Faces

Since 1998
Assistant Professor
Dr. Christopher D. Ellis holds an MLA and a Ph.D. Dr. Ellis is the Region 3 representative for the Council of Educators in Landscape Architecture. Dr. Ellis’ interests include landscape architecture, landscape planning, landscape ecology, spatial modeling and analysis and applications of information technology to planning and design.

Since 1995
Associate Professor
Dr. Chang-Shan Huang’s areas of interest lie in evidence-based design methodology, healthy community design, sustainable urban design, therapeutic garden design, design communication, and design pedagogy. He is a member of the American Institute of Certified Planners and a registered Landscape Architect in the State of Texas.

Since 1974
Professor
Dr. Harlow Landphair holds a Joint appointment as a Research Scientist with the Texas Transportation Institute, Environmental Management Program. His research interest are in stormwater quality, soil erosion control and landscape impacts on traffic and pedestrian safety. He is registered in Texas and Arizona and currently Chairs the Transportation Research Board Committee on Landscape and Environmental Design.

Since 1988
Professor
Dr. Jon Rodiek has been a faculty member at Texas A&M for 15 years. Dr. Rodiek is the coordinator of the MLA program and the editor-in-chief of Landscape and Urban Planning. Dr. Rodiek’s areas of interest are in wildlife habitat planning, planting design, landscape resource management and site planning.

Since 2000
Assistant Professor
Professor Jody Rosenblatt Naderi graduated from Harvard University with an MLA degree. Her research and teaching interests focus on the creation of places of renewal in the landscape of the everyday. Her current research focuses on measuring pedestrian health and safety outcomes in simulated transportation corridors of urban communities in Texas. She is a registered landscape architect in Florida.

Since 1995
Associate Professor
Professor Nancy Volkman’s areas of interest include landscape history, cultural landscape preservation, rural land planning, and spirituality in the landscape. She is currently working on a new edition of Landscapes in History and a book on the Islamic garden in America.

Since 1988
Associate Professor
Professor Tom Woodfin graduated from Harvard with an MLA degree. Professor Woodfin’s areas of interest in landscape architecture are geographical information systems (GIS), historical cartography, and industrial development sustainability.

Since 1969
Associate Professor
Dr. Michael Murphy holds a Ph.D. from the University of Pretoria in South Africa. His master’s degree is from the University of California at Berkeley. He holds two degrees from TAMU — a Range Science degree and a BLA which he received in 1966. Dr. Murphy’s interests include interdisciplinary design and programming, environmental planning and design.

Since 1981
Associate Professor
Mr. Walter Peacock is interested in urban planning, sustainable community development, natural hazard, hazard mitigation, and quantitative methods.
Program News

BLA Program Reaccredited for Six Years

In March, the CLARB accreditation team spent 3 days in College Station reviewing the Bachelor’s program. They interviewed administrators, faculty, students and many former students. We thank those who participated in this process by talking with the team. Their findings, first reported at the end of their visit, were summarized in a letter of reaccreditation received in August. Although we have some work in following up on their suggestions for improvement, the BLA program was unanimously reaccredited for a six-year term, the new longer length between reviews. Thanks again to those of you who talked with the accreditation team.

BLA Students Win Design Competition

Melody Gray, fifth year BLA, and Natalie Lamb, BLA ’02, placed highest among landscape architecture students participating in an annual design competition held by four architecture and design schools in the metro Washington, D.C. area. Judging by six architects and two landscape architects took place at the imposing National Buildings Museum in Washington. Their design for a U.S.D.A. Farmer’s Market was sited near the Mall and used materials related to the nearby Smithsonian “Castle.”

“Y’all should be proud because we couldn’t have whipped it all out in four days without excellent training and support from you in the past. Thanks for all of your encouragement and insights…” said Gray in her email to the LAND faculty.

Congratulations to both Melody and Natalie!

Your Donations at Work

The level of contributions has been so significant that our Development Fund is now an Endowed Fund, meaning that we can withdraw interest to support program activities. Our first expenditure was for transportation of students to the ASLA Conference in New Orleans. Eleven students, most of whom would not have been able to make the trip without this assistance, attended the conference thanks to the vans we were able to rent. As the Development Fund grows we will be supporting other education-enhancing programs for our students.

We Remember
(Continued from page 1)

Robert F. White

One more of the great figures of twentieth century landscape architecture has passed from this earth. It is our sad duty to report the death of Robert F. White on April the 18th, 2003. He was ninety. Robert White was the inspiration behind the Department of Landscape Architecture at Texas A&M, appointed as its first Head of Department when the program was relocated from Horticulture to the School of Architecture in 1962. He served in that capacity until his retirement in 1975 when Don Austin assumed the post.

Robert White, known as Bob to his many friends, came from Pittsburgh to work with Ruth London, a Houston landscape architect, following World War II. He moved to College Station to accept a position as Assistant Professor of Landscape Architecture in 1947. He and his wife Florence made Texas their home for over fifty years. Bob left the faculty briefly in 1958 when he returned to Houston to open his design practice with Fred Klatt, and later George Porcher, but returned to Texas A&M when he was appointed Department Head in 1962. He continued with his practice for several more years, traveling between College Station and Houston by train to work over long weekends until regular rail service was suspended.

Bob White had a profound influence on Landscape Architecture in Texas. His significant professional projects included the design of the Clear Lake campus of NASA and serving for many years as Landscape Architect for Rice University. His influence as a teacher was equally important. To many generations of students, Mr. White represented the very best of the profession, establishing the bar to which they aspired. During his time as Department Head, Bob established a strong working relationship with Lady Bird Johnson in her efforts to beautify the Texas landscape. He served as design consultant on the Lyndon Baines Johnson Home Site restoration in Stone Wall in 1965, as Judge for the Texas Highway Department Roadside Beautification Awards program and consultant for the Lyndon Baines Johnson Ranch in 1970.

Bob served tirelessly as a member and officer of the American Society of Landscape Architects in the Southwest Chapter that included Texas, Oklahoma, Arkansas and Louisiana, and later after it was organized, in the Texas Chapter. He also served on the adjudication panel for the ASLA National Awards program in 1978. But, his most lasting influence on the professional organization probably resulted from his long time support of the Texas A&M Student Chapter of ASLA, which served as a conduit for a continuing source of renewed leadership for the State organization. In 1975 Bob was named a Fellow of the ASLA, adding to his many professional and civic recognitions.

To his students Mr. White was most known for his impeccable, and always formal, manners and dress; his love of teaching, and in particular, the students; and his rather intimidating re-service. He established and maintained the very highest standards of design excellence, that was always evident in his own work and which he demanded of his students as well. It has been many years since Robert White was in a classroom, but his influence may still be felt in the dedication to excellence he established among several generations of Texas landscape architects who are still active. Few have been able to meet his standard, but many still pursue it as the only worthwhile goal for the profession. Those of us who were fortunate enough to have been one of his students will long remember his dedication to the formation and advancement of our careers as practitioners and as carriers of the flame of the profession in which he was one of the most notable of its Texas pioneers.

As the guiding lights of the Twentieth Century now pass from the scene it is clear that we are now fully established in the Twenty First. Notice of Bob’s passing may serve as an inspiration to those who must follow and provide the leadership to make our way in the future, but for many of us it will be a more lonely way without him.

Robert Rucker

Robert Rucker was born and raised in Franklin, Texas. At A&M Bob was in A Company of the Corps of Cadets. After graduation, his first position was as a high school instructor teaching landscape design and maintenance in a San Antonio vocational training program, thus beginning his lifelong commitment to education. He was called up for military service in 1942, serving in the 60th Infantry Regiment of the 9th Infantry as Commander of K Company. While in action in North Africa he lost a leg and nearly lost his life after stepping on a land mine. After a yearlong recovery period Bob accepted a position as campus landscape architect at Baylor University. A year later he moved on to the University of Oklahoma. While there his professional practice included campus plans for a number of Baptist-sponsored colleges, including Campbell College and Howard Payne College. In 1968 Bob returned to TAMU to become Head of the Department of Horticulture, the position from which he retired in 1977. Since 1992 he had been living in the Woodlands, remaining active until the last few months before his death. His daughter Virginia, reported that to the last he was a loyal Aggie—on his last day his two concerns were his grandchildren and his season tickets to Kyle Field.

Lane Marshall

Lane Marshall, Department Head from 1981 to 1988, died in June. Lane came to TAMU after receiving a Masters degree from the University of Illinois, where he had also taught. Prior to entering academia Lane managed his own successful practice in Florida. There he had won over 30 awards from the Florida chapter of ASLA. After leaving TAMU Lane served as Dean in the College of Architecture and Design at Kansas State University. Lane’s many contributions to TAMU and the profession included development of the innovative Atelier summer program, which brought nationally known professionals to TAMU for intensive summer studies, and his leadership as national president of ASLA from 1979 to 1980, a period of great growth and change within the organization.

(For Dan Heyn See page 7)
Class News

Fifth Year Students Design Their Dream Homestead

The fifth year senior design studio, held each spring, marks a significant point in all BLA Seniors’ academic careers. It is the last design studio they will have at the undergraduate level. For most, it is the last time they will have any formal design studio of any kind. This year the seniors agreed to take on a full semester project on an individual basis. Each senior was essentially a one-person team for the entire spring semester. The project involved the selection of a one square mile piece of rural property somewhere in the state of Texas. Each student (27 total) was to find one site in a county in Texas where they would locate their dream home site. They were to master plan the land uses for the property and locate their residence on it.

The semester was divided into research/inventory phase (February), an analysis phase (March) and a synthesis phase (April). In January each student spent every class period in the computer lab learning the techniques of Photoshop. The results were impressive. The end product was an eighteen-page, 11x17 full color report of their planning and design work. In addition students had to produce a CD of their work. The goal was to get the student to begin the process of performing like a real landscape architect while in college. The experiment worked well. Each student became very familiar with web sites and computer program applications that would be used daily in a real professional office. Judging from the attitudes and performance levels of all students it was determined that the experiment was a significant success. We hope to use this approach again next year with a different design project.

Students Learn by Doing in Service Projects

The old axiom that the best gifts come in small packages proved true for both the town of West University Place and the Fourth Year students in Landscape Design IV. The park system of this community on the west side of Houston recently acquired a small, but centrally located house lot that they wanted to transform into the centerpiece of their small town center. Located at the intersection of Rice and Auden streets in West University Place the pocket park is intended to serve as a community “family room” for those using the adjoining library and community center, or nearby City Hall. Landscape Design IV was asked to provide design ideas for Friends of West University Place Parks Fund, Inc. and City of West University Place. The twenty-four students in the class first met with a group of interested local residents, queried them about their intentions for the new park, worked to resolve the many different desires of the community for this very small space, and finally presented their alternative design concepts at a meeting of the West University Place Parks Board. Resident response proved so enthusiastic that the Friends of the Park and the Board are now working to employ a local landscape architect to finalize design and construction plans.

Facility Create ASLA Award Archive

The Landscape Architecture Award Winners Archive began as a dream of making the best of Texas landscape architectural design and planning available to students, professionals, and the public via the World Wide Web. The archive is now a reality, containing 314 Texas Chapter ASLA award-winning projects dating from 1986, stored in archival format in the Technical Resource Center of the College of Architecture. At present 194 of these projects, including 1680 images and hundreds of pages of descriptions and documents, are viewable via the website http://aslatx.tamu.edu. The archive database may be searched by project type, project location, award year and firm name. For more information regarding the archive please contact: Tom Woodfin (woodfin@tamu.edu) or Taner R. Ozdil (tozdil@archone.tamu.edu).
More than $11,000 Awarded in Scholarships

At our annual Awards Banquet held last April, scholarships of several types were given to current students. We thank the donors who have made these awards possible. We would like to recognize the following winners and congratulate them on both their academic success and their scholarship award.

Gene Schrickel Jr. ’50 Endowed Scholarship in Landscape Architecture received by Ben Brown - $1,000 and Dipali Trivedi - $1,000. Gene and Helen Schrickel endowed this scholarship in memory of Gene's parents, Ollie and Blache Schrickel. It is awarded to a full-time student for excellence in academics and design.

Samuel E. Garrett Jr. Endowed Memorial Scholarship received by Robert Deegan - $1,000. This scholarship was endowed by Sam and Alice Garrett in memory of their son Sam. It is given to a third year undergraduate student for outstanding academic achievement, as well as personal and professional growth.

Robert F. & Florence H. White Endowed Scholarship in Landscape Architecture received by Amber Paeth - $500. Given by Robert and Florence White, this endowed scholarship recognizes a fourth year student whose performance in departmental courses has been outstanding.

ASLA Texas Chapter Maurice Philips Scholarship received by Serena Gibson - $750. This award, given by the Texas Chapter, recognizes scholarship, financial need and moral character. It is given to a student who has contributed significantly to the profession through activities in the Student Chapter of ASLA.

Antonio F. Sarabando Jr. "Spirit of Place Award" received by Haley Heard - $200. Antonio Sarabando Jr., Class of ’85, endowed this scholarship in dedication to his parents Antonio and Maria Sarabando. It is given to a student who has demonstrated a spirited commitment to TAMU and the department.

Colonel James E. Ray ’63 Endowed Scholarship received by Travis Taylor - $1,000. This award was established to recognize the contribution of Col James Ray, former Development Officer, to the College. It is offered on a rotating basis to a student in one of the three departments. The award winner is determined based upon academic achievement, extracurricular activities and financial need.

Master of Landscape Architecture Scholarship 2002-2003 ($1000 each) received by Chui-Ya Wang, Ying Dong, Sweta Gupta, Dipali Trivedi and Erin Bouck. Established by Dr. Jon Rodiek for MLA students, these scholarships are funded through class project and service activities. Awards are made on the basis of academic accomplishment.

Robert Castro Scholarship not awarded due to insufficient funds. Established to honor undergraduate student Robert Castro who died in 2001 just months after graduating. This scholarship needs additional support.

Should you wish to make a donation to increase the value of these scholarships please make your check in the name of the fund to which it should go and send it to Dr. Chang-Shan Huang, Associate Department Head, LAUP, Texas A&M University, College Station, TX 77845-3137.

A special thanks to the sponsors of the 2003 Landscape Architecture and Urban Planning Awards Banquet. Your generosity helped make this event a huge success. We continue to need sponsors for our upcoming banquet which will be on April 16th. If you would like to help us in this matter, please contact Dr. Walter Peacock, Interim Department Head, LAUP, Texas A&M University, College Station, TX 77845-3137. Listed below are the sponsors of the 2003 Awards Banquet:

Jim Gray
Wayne Kittelson
Martin Sanchez
George Seagraves
Dan Sefko

BLA Grad Named Outstanding Former Student of College

Alan B. Colyer, class of 1981 and a former Workshop Chair, was recognized this fall as an Outstanding Alumnus of the College. Alan has been very active in supporting our programs over the years. He has served on the departmental Advisory Board since 1993. He has also represented former students on several accreditation visits.

Both the Landscape Architecture and Architecture programs have invited him to give guest lectures. Most recently he spoke at the 2003 Workshop. Alan is currently a Vice President and Business Development Manager at HOKs Houston office.

Every year the College of Architecture recognizes distinguished former students for their contributions to the College and to their respective professions. To date seven graduates of the LAND programs have received this award. Those previously recognized are:

- Morris ‘Buddy’ Benz ’32
- Naud Burnett ’47
- James Gray ’76
- F. W. Hensel ’07
- Mary Margaret Jones ’79
- Christiaan E. Mulder ’80
- Gene Schrickel Jr. ’50

If you would like to nominate a TAMU graduate for this award please send their name and contact information with a brief explanation of why you consider them an outstanding former student to Nancy Volkman at nvolkman@archone.tamu.edu.
Dan Heyn

Dan Heyn attended Texas A&M University after serving in the navy during World War II. He considered himself a disciple of Bob White, with whom he had close rapport while in school. After graduation Dan practiced first in Houston, and later in Dallas. Among his many projects were Austin College in Sherman, Northlake College, and the main campus at Texas Instruments. He also designed the grounds of many private homes in Dallas and Midland. Colleagues recall the beauty of his drawing, as well as the designs they depict having been works of art. He was also an early advocate of the use of Texas native plants. His wife Dottie and their family have requested that memorials be made in his memory to the Dallas Arboretum or Children’s Medical Center of Dallas. The college is currently working with his family and long-time friends to acquire his drawings for an archive.

We need your email address...
Future editions of AggieLAND will be distributed via the Internet.
So, we need an address to which to send it.

To receive future AggieLANDs, please send your email address to LAUPSTUD@archone.tamu.edu, use “AggieLAND” as the subject line.

Or if you preferred, fill out this form, cut it out and send it to us at:

--- BLA Students Study Away from Campus ---

Three venues await the BLA students who choose to study away from campus, each offers a different and rewarding experience.

ITALY – situated in the Tuscan hilltown of Castiglione Fiorentino, our Italy program has been welcoming Aggies for twenty years. Texas A&M and Italian faculty introduce students to Italian culture, including many of the priceless artworks of medieval and Renaissance Italy. The students experience first-hand the extraordinary architecture, villas and gardens of this country. Classes in sculpture, drawing, stone carving and other hands-on ways of making art are available.

SPAIN – centered in Barcelona, this program is led by Spanish architects and designers who introduce students to the history of European cities, urban design and challenge them to design contemporary solutions within an historic context. Famous for its urbanity and public street life, Barcelona offers students an unforgettable learning experience in one of the most beautiful cities in the world.

VIRGINIA – working in the heart of historic Alexandria, VA, half an hour from the U.S. Capitol, students are part of an eight-school consortium led by Virginia Tech. Studios are chosen by the student based on project interest and students from Europe, Asia, South America and the U.S. work side-by-side. Professional curriculum offerings allow a student to take courses at the Alexandria Center as well as art courses through the local artists’ consortium.

Santa Chiara Study Center
Letter from the Interim Department Head

Having "volunteered" to take on the job of serving as the Interim Department Head, I would like to explain the major duties for which I believe a Head, whether temporary or permanent, is responsible. We have three principle roles: facilitator, coordinator, and advocate. While these roles are interdependent, I will talk about each separately, to better explain how these activities are carried out in an academic program.

Head as Facilitator: As facilitator, a Head must seek to ensure that faculty members are able to pursue teaching activities and research agendas. If the faculty does not grow intellectually through their individual pursuits of teaching and research, they will stagnate and have less to offer the students and the professions that the department serves.

Head as Coordinator: Probably the most difficult role is that of coordinator. A Head must work to ensure that decisions and policies of the Department and the College are carried out in concert with individual goals, while minimizing potential conflicts. Also, the Head needs to work with and integrate the various constituencies served by our programs—firms, governmental agencies, former students, and current students, among others.

Head as Advocate: The Head is a key representative for the Department and its members, putting forth their best image and strongest case. As a result, there must be good communication within the Department, and with those interested in the success and growth of our professional programs.

It is with this last responsibility in mind, that I am particularly glad that the landscape architecture faculty has initiated AggieLAND to keep you informed of what we are doing in College Station.

Sincerely,

Walt Peacock
